

Brar Elettromeccanica Spa, represented by Arioli family, has been constantly oriented towards the satisfaction of its customers for almost 50 years by offering products and services with high standards of quality and technological innovation.

Vision

- Become the global leader in high current transmission, an invaluable partner.
- Being a team of responsible, determined, proactive people who can guarantee the greatest professional competence in the search for innovative solutions that meet the customer's needs in busbar production for electrical vehicles
- Constantly increase the level of know-how with a continuous look at innovation
- Improve the skills and involvement of human resources, encouraging participation and sharing of Quality goals through education, training and effective communication

Mission

- Generate profit for the company, to guarantee business continuity, through the compliance of the products supplied with the customer's requirements, as well as with the applicable laws, rules and regulations, managing the consequent risks and opportunities
- Implement and maintain a quality management system according to international standards IATF 16949:2016 and ISO 9001:2015
- Systematically pursuing continuous improvement, optimizing processes and organization in order to reduce, as far as possible, waste of means and resources
- Aiming for environmental, economic and social sustainability by adopting those practices and behaviors that can bring benefits to ourselves and to the environment in which we operate.
